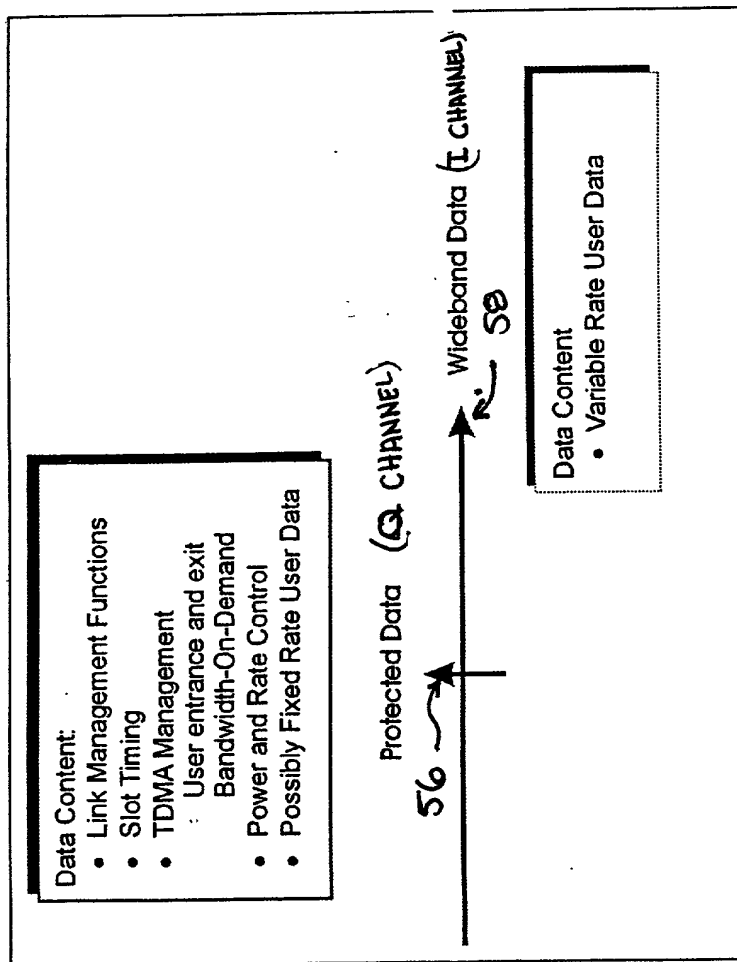

Figure 3 Bi-BPSK Waveform.

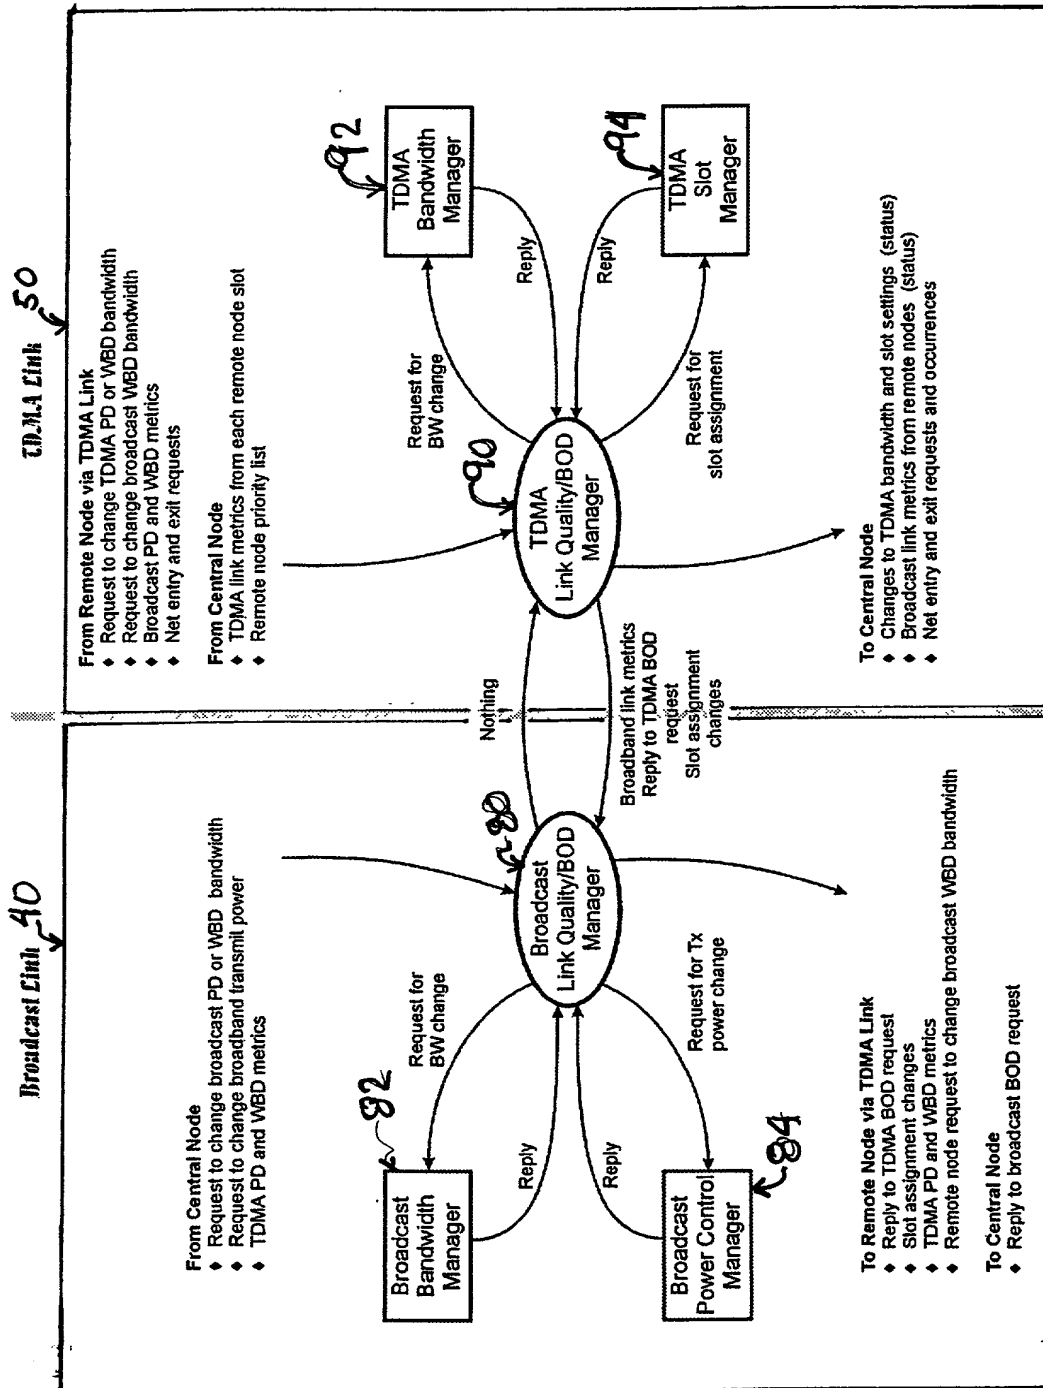

Figure 4 Link Quality Functionality Diagram.

FIG. 5 is a diagram illustrating a network topology. A central node (120) is shown emitting broadcast signals (140) which are received by multiple remote nodes (130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200). The diagram also shows a TDMA (Time Division Multiple Access) link being established between the central node and the remote nodes.
